

STORSERVER DATA PROTECTION FOR ORACLE RDB

INTEGRATED POWER

- Fully integrated with Oracle RMU
- Fully integrated with IBM Spectrum Protect
- Full or incremental backups of online database
- Online restore of storage areas
- Initiate with scripts or from command line
- Advanced Encryption Standard (AES) 256-bit encryption
- Transport Layer Security (TLS) protocol for secure communications

REDUCES DOWNTIME

- Automated processes
- Increased database availability

PROTECTION FOR ORACLE RDB DATABASES ON OPENVMS

STORServer® Data Protection (SDP) for Oracle® Rdb provides a centralized backup and archive solution for your Oracle Rdb databases. Running on the OpenVMS™ platform, SDP for Oracle Rdb provides the interface between the Oracle Rdb Management Utility (RMU) and IBM Spectrum® Protect, allowing RMU to back up and archive database content to your IBM Spectrum Protect server. The powerful combination of SDP, RMU, and IBM Spectrum Protect ensures superior protection of your irreplaceable application data.

SDP for Oracle Rdb is designed to be “application-aware.” Data protection features are closely integrated with the Oracle Rdb databases. Your database server can continue to execute mission-critical applications while automated data protection occurs. Data is safely secured in IBM Spectrum Protect storage and can be restored as needed.

SDP for Oracle Rdb provides a powerful, fast, and highly reliable automated solution for Rdb database protection.

Software Requirements

Operating System:

- I64 with OpenVMS Version 8.2 or newer
- Alpha with OpenVMS Version 7.2 or newer

Database:

- Oracle Rdb Version 7.2 or newer
- Oracle Rdb Version 7.1.2.1.0 or newer with the appropriate patch set:
 - Rdb Release 7.1.2.1.0 (AMV): ID: 5029367, patch set: 3261866
 - Rdb Release 7.1.2.1.1 (AMV Performance Kit), ID: 5029333, patch set: 3261862

IBM Spectrum Protect Server:

- Access to one of the following servers:
 - IBM Spectrum Protect Version 8.1 or newer
 - IBM Tivoli Storage Manager Version 7.1 or newer
- Features such as encryption and TLS may require additional software
